WHAT BAXTER SHOT.

Moral: Don't Draw Hasty Conclusions From Insufficient Premises.

Wife (to husband who has just rearned home) -Any news in town? Husband-Nothing.

"Of course not. Oh, well, there is never any news for a woman unless she finds it out for herself."

After a long silence the husband breaks in with:

"It does seem to me that people

ought to be more careful."

"What about?" "I was thinking of something that occurred last night. Jack Baxter and his family sat out in the garden until quite late, and when Baxter got up and went in he had not noticed that his little son had slipped away. Just as Baxter stepped into his room he heard something under the bed-in' fact, saw something-and, thinking that a burglar had secreted himself there, he seized a revolver and fired

under the bed, and "Merciful goodness! and shot his little son?"

"Who said he she his son?" "You said his son went under the bed."

"I didn't."

"What did you say?" "I said that he did not notice his son when he went into the room." "And wasn't the boy under the

"No; a cat was under the bed." "You are in a most disagreeable

temper this evening, William." "Why so? Just because the boy did I had nothing to do with it, I assure you."-London Tit-Bits.

A SORCERER SCARE.

Kept French Villagers in Their Homes for Several Evenings

A young farmer living near Chavigny, a village in France, was attacked with consumption some time ago and, as the local physician was unable to do him any good, his father applied for advice to a soothsayer, who duly visited the patient, but proved of such small service to him that he died in a few days, says

the New York Herald. To the disconsolate father the soothsayer then said; "Do not blame me, for it is a sorcerer who has killed your son by easting an evil eye on him. This mischief is done, but fortunately, I can prevent the sorcerer from doing any more. I clearly foresee that this evil-doer will return to the village some evening at sunset, and that he will surely again cast the evil eye on the first person whom he meets at that time. If you! and I spread this news broadcast, it is not likely that he will meet anyone as he enters the village, and thus

your son will be his only victim." Within an hour or two everyone in Chavigny had heard this strange prediction, and as a result there was not a human being in the streets when the sun set that evening. For several days afterward the people locked themselves in their houses at even- ulcers and any open or old sore. ing, and only now, it is said, are the more skeptical among them begin-

Night and day, until the strength is entirely exhausted, and that dreaded word "Consumption" begins to be whis-pered among friends. That's a common story, familiar to the people of every town and village.

There's another story which ought to be as widely known as the story of disease, and that is the story of the cures effected by the use of Dr. Pierce's Golden Medical Discovery. Bronchitis, asthma, obstinate, deep-seated coughs, bleeding of the lungs, and other forms of disease which affect the respiratory organs, are permanently cured by the use of "Golden Medical Discovery.

Medical Discovery."

"Only for Dr. Pierce's Golden Medical Discovery I think I would be in my grave to-day," writes Mr. Moses Miles, of Hilliard, Uinta Co., Wyoming. "I had asthma so bad I could not sleep at night and was compelled to give up work. It affected my lungs so that I coughed all the time, both night and day. My friends all thought I had consumption. My wife insisted on my trying Dr. Pierce's Golden Medical Discovery — which I did. I have taken four bottles and am now a well man, weighing 185 pounds, thanks to Dr. Pierce's Golden Medical Discovery."

Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for book in paper covers or 31 stamps for cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

A GREAT HIT.

DRAINS AND SANITATION. Ways and Means of Caring for the

Fublic Realth. The basis of knowledge on which sanitation rests is furnished by the observation of facts on a large scale as they occur in actual life, says the Contemporary Review. Its aim has been the removal of conditions which experience has shown to be favorable to the propagation and spread of disease, and the substitution of other conditions. In general this means the removal of what we call dirt. Hence we get the purification of the ground | Due from State by drainage, by refuse disposal, by impervious paving, and so on; the purification of drinking water by subsidence and filtration, or by having Specie..... recourse to unpolluted sources, deep | Currency wells and springs; the purification of Exchange for food stuffs by inspection, and the destruction of unwholesome articles; Furniture and Fixtures.... 1800 00 the purification of the air by ventillation and regulations as to space; the purification of rivers by the diversion of polluting materials, and so on. Such was the line of activity, the sim being the improvement of the general conditions of life. It acts in two ways; it removes those agencies by which disease is fostered and pread and it promotes health, thereby rendering individuals less suscepible to such risks as they may encounter. Another measure must be namely, the segregation of the sick COUNTY OF CHRISTIAN.
